Dear Dr. Raskin:

I just want to thank you for reshaping my body and my life!
Thank you for the great experience you and your office staff gave me. Everyone there was very professional and the atmosphere was very relaxed, I really appreciate the very personal service I was given. You made the decision to have breast augmentation very easy for me. After spending an hour with my husband and I, you choose the perfect size and shape implant for my frame which looks very natural and is proportionate to my body. The surgical experience was a very positive one. The staff at Greenwich Hospital is wonderful, they made me feel comfortable and provide exceptional care. I had a completely pain free recovery and I know that is a direct result of a skillful surgeon. I am extremely happy with my new breasts, I will recommend you to all my friends who are considering any type of cosmetic surgery.

Thank you so much for everything, you are a true artist!

T.Valentine
